Electrical Energy Management

1981 feature index

A complete listing of feature articles which have appeared during the past year

Circuit Protection

Choosing Medium-Voltage Switchgear
June/July, p. 6

Selecting Equipment For Low-Voltage Circuit Protection
June/July, p. 10

Updating Switchgear At Huge McDonnell Douglas Parts Plant
June/July, p. 19

Demand Control

Washer And Oven Heat Element Cycling Pays Demand Dividend
August/September, p. 19

EEI Prize Paper:
Load Management: A Must In The Foundry Industry
October/November, p. 14

Energy-Efficient Motors

Special Report On Energy-Efficient Motors
February/March, p. 6

Paper Mill Cuts Costs And Wastes With Energy-Efficient Motors
February/March, p. 8

NEMA Motor Efficiency Standards: Unambiguous Basis For Motor/Cost Performance Evaluation
February/March, p. 12

Energy Management Systems

Distributed Digital Control: Improved Reliability And Flexibility For Electrical Energy Managers
October/November, p. 8

Selecting And Specifying An Electrical Energy Management Control System
October/November, p. 17

Building Management System Has Six-Month Payback
October/November, p. 22

Energy-Saving Methods

Paper Mill Cuts Costs And Wastes With Energy-Efficient Motors
February/March, p. 8

Determining Your Power Factor—And How To Improve It
February/March, p. 16

Energy Efficiency Contributes To All-Electric Forging Plant's Growth
February/March, p. 22

Industrial Relighting Program Cuts Annual Electricity Costs By $1.5 Million And Conserves Energy
April/May, p. 8

Low-Voltage Switching Systems: Versatile Control For Lighting
April/May, p. 12

Glare-Free Lighting:
A Necessity For Tiny Relay Assembly
June/July, p. 22

Special Report:
Power Factor Controllers
August/September, p. 8

Industrial Capacitors: Cost-Effective Power Factor Improvement Tools
August/September, p. 16

Washer And Oven Heat Element Cycling Pays Demand Dividend
August/September, p. 19

EEI Prize Paper:
Load Management: A Must In The Foundry Industry
October/November, p. 14

Building Management System Has Six-Month Payback
October/November, p. 22

Lighting

Special Report:
Efficient Lighting Guide
April/May, p. 5

Industrial Relighting Program Cuts Annual Electricity Costs By $1.5 Million And Conserves Energy
April/May, p. 8

Low-Voltage Switching Systems: Versatile Control For Lighting
April/May, p. 12

Appropriate Lighting:
A Key To Effective Business Operation
April/May, p. 15

Glare-Free Lighting:
A Necessity For Tiny Relay Assembly
June/July, p. 22

EEI Prize Paper:
HPS Outdoor Relighting: An Economic Package From Georgia Power
December/January, p. 14

Programmable Lighting Controls:
Fast-Payback Systems For Energy Cost Control
December/January, p. 16

Is it Cost-Effective To Retrofit Fluorescent Troffers?
December/January, p. 19

Maintenance Instrumentation

Thermographic Surveys Can Cut Maintenance And Energy Costs
December/January, p. 6

Electrical Test Instruments Help Avoid Equipment Inefficiencies And Catastrophic Failures
December/January, p. 9

Manufacturers List

High-Efficiency Motors
February/March, p. 9

Efficient Lighting Products
April/May, p. 24

Switchgear And Circuit Protection Products
June/July, p. 34

Power Factor Improvement Products
August/September, p. 28

Electrical Energy Management Systems
October/November, p. 25

Power Factor Improvement

Determining Your Power Factor—And How To Improve It
February/March, p. 16

Special Report:
Power Factor Controllers
August/September, p. 8

Industrial Capacitors:
Cost-Effective Power Factor Improvement Tools
August/September, p. 16

Thermal Storage

EEI Prize Paper:
Ice Storage: The Cooling System That Benefits Customer And Utility
August/September, p. 12

Electrical Energy Management

1981 feature index

A complete listing of feature articles which have appeared during the past year

Circuit Protection

Choosing Medium-Voltage Switchgear
June/July, p. 6

Selecting Equipment For Low-Voltage Circuit Protection
June/July, p. 10

Updating Switchgear At Huge McDonnell Douglas Parts Plant
June/July, p. 19

Demand Control

Washer And Oven Heat Element Cycling Pays Demand Dividend
August/September, p. 19

EEI Prize Paper:
Load Management: A Must In The Foundry Industry
October/November, p. 14

Energy-Efficient Motors

Special Report On Energy-Efficient Motors
February/March, p. 6

Paper Mill Cuts Costs And Wastes With Energy-Efficient Motors
February/March, p. 8

NEMA Motor Efficiency Standards: Unambiguous Basis For Motor/Cost Performance Evaluation
February/March, p. 12

Energy Management Systems

Distributed Digital Control: Improved Reliability And Flexibility For Electrical Energy Managers
October/November, p. 8

Selecting And Specifying An Electrical Energy Management Control System
October/November, p. 17

Building Management System Has Six-Month Payback
October/November, p. 22

Energy-Saving Methods

Paper Mill Cuts Costs And Wastes With Energy-Efficient Motors
February/March, p. 8

Determining Your Power Factor—And How To Improve It
February/March, p. 16

Energy Efficiency Contributes To All-Electric Forging Plant's Growth
February/March, p. 22

Industrial Relighting Program Cuts Annual Electricity Costs By $1.5 Million And Conserves Energy
April/May, p. 8

Low-Voltage Switching Systems: Versatile Control For Lighting
April/May, p. 12

Glare-Free Lighting:
A Necessity For Tiny Relay Assembly
June/July, p. 22

Special Report:
Power Factor Controllers
August/September, p. 8

Industrial Capacitors: Cost-Effective Power Factor Improvement Tools
August/September, p. 16

Washer And Oven Heat Element Cycling Pays Demand Dividend
August/September, p. 19

EEI Prize Paper:
Load Management: A Must In The Foundry Industry
October/November, p. 14

Building Management System Has Six-Month Payback
October/November, p. 22

Lighting

Special Report:
Efficient Lighting Guide
April/May, p. 5

Industrial Relighting Program Cuts Annual Electricity Costs By $1.5 Million And Conserves Energy
April/May, p. 8

Low-Voltage Switching Systems: Versatile Control For Lighting
April/May, p. 12

Appropriate Lighting:
A Key To Effective Business Operation
April/May, p. 15

Glare-Free Lighting:
A Necessity For Tiny Relay Assembly
June/July, p. 22

EEI Prize Paper:
HPS Outdoor Relighting: An Economic Package From Georgia Power
December/January, p. 14

Programmable Lighting Controls:
Fast-Payback Systems For Energy Cost Control
December/January, p. 16

Is it Cost-Effective To Retrofit Fluorescent Troffers?
December/January, p. 19

Maintenance Instrumentation

Thermographic Surveys Can Cut Maintenance And Energy Costs
December/January, p. 6

Electrical Test Instruments Help Avoid Equipment Inefficiencies And Catastrophic Failures
December/January, p. 9

Manufacturers List

High-Efficiency Motors
February/March, p. 9

Efficient Lighting Products
April/May, p. 24

Switchgear And Circuit Protection Products
June/July, p. 34

Power Factor Improvement Products
August/September, p. 28

Electrical Energy Management Systems
October/November, p. 25

Power Factor Improvement

Determining Your Power Factor—And How To Improve It
February/March, p. 16

Special Report:
Power Factor Controllers
August/September, p. 8

Industrial Capacitors:
Cost-Effective Power Factor Improvement Tools
August/September, p. 16

Thermal Storage

EEI Prize Paper:
Ice Storage: The Cooling System That Benefits Customer And Utility
August/September, p. 12
